The will like to thank several people for helping and guiding me throughout my Ph.D. project. It has been a challenging process, but I am thankful for all the people who have helped me through it. Firstly, I would like to thank my principal supervisor Carsten Uhd Nielsen for his excellent guidance during the Ph.D. project, and thank you for always having your door open. I appreciate all of our scientific discussions, and it has been a privileged being a Ph.D.-student under your supervision.

I want to thank my co-supervisors René Holm and Kenneth Vielsted Christensen for their guidance during the project. Thank you to René for providing me with the opportunity to work at H. Lundbeck A/S, and for your advices throughout the project. Thank you to Kenneth for your daily support during my stay at H. Lundbeck A/S, and for your guidance and support within the field of molecular biology. I further thank Kirsten Olesen for her helping with the technical work at H. Lundbeck A/S, and I thank the group “Drug Discovery Neuroscience” at H. Lundbeck for letting me used their laboratory facilities.

I will like to thank Susanne Mandrup for letting me use her laboratory facilities at the Department of biochemistry and Molecular Biology at SDU. A special thank to Ronni Nielsen and Lykke Haastrup Hansen for their help and guidance with experiments in molecular biology.

I also want to thank the members of the “Drug transporters in ADME” group at the University of Southern Denmark. I thank technician Maria Læssøe Pedersen for her skilful help with cell cultivation and for all of her guidance in various laboratory technics. I also want to thank Ahmed Abdulkareem Abdulhussein Al-Ali, who I have

shared office with throughout the entire project. Thank you, Ahmed, for making the office a joyful working environment, and for being a good friend.

Lastly, but not least I want to thank my girlfriend Line Aabjerg Larsen for her support and love. Thank you for helping me through the tough times and for supporting me.

Rune Nørgaard Rasmussen, January 2019
